Hostage to impeachment issue

By Josephine
 The House of Representatives has passed a resolution to impeach President Fidel V. Ramos for alleged abuse of power. The resolution, which was passed by a vote of 18-1, is the first step in the impeachment process. The House will now move on to the second step, which is to draft articles of impeachment. The House will then send the articles to the Senate for trial. The Senate will then decide whether to convict the president and remove him from office.

SWS: Lawyers enjoy more amenities than judges

By Josephine
 The Supreme Court has ruled that lawyers are entitled to more amenities than judges. The court's decision was based on the fact that lawyers are the ones who are responsible for the administration of the justice system. The court said that lawyers are entitled to more amenities than judges because they are the ones who are responsible for the administration of the justice system.

Uzbek Senate votes to evict US forces

TAJIKISTAN—The Uzbekistan Senate approved today to an order expelling US soldiers from the country and even threatened to cancel cooperation from Washington for alleged involvement in the 2001 terrorist attacks.

The resolution was passed after a vote of 100 to 0 in the 100-member Senate, which is the upper house of the country's parliament.

The resolution also calls for the US to withdraw its troops from the country.

The other numbers game

When we hear the word "numbers" in connection with the Philippine economy, we usually think of the Gross Domestic Product (GDP) and the Gross Regional Product (GRP).

But there are other numbers that are equally important, if not more so, in determining the country's economic health.

EDITORIAL

One of these is the number of people who are employed in the country. This is a key indicator of the country's economic growth and development.

Another is the number of people who are unemployed. This is a key indicator of the country's economic stagnation and poverty.

These numbers are not just statistics. They are the lives of millions of people who are struggling to make a living.

Therefore, we must pay attention to these numbers and take steps to improve them. This is the only way to ensure a better future for the Philippines.

We must also pay attention to the quality of the employment. It is not enough to have a job; it must be a good job that provides a decent living.

Finally, we must pay attention to the distribution of income. It is not enough to have a growing economy; the benefits must be shared by all.

These are the numbers that we must focus on if we want to see real progress in the Philippines. They are the numbers that will determine the country's future.

We must also pay attention to the number of people who are educated. This is a key indicator of the country's human capital and potential.

Therefore, we must invest in education and ensure that every child has access to quality education. This is the only way to ensure a bright future for the Philippines.

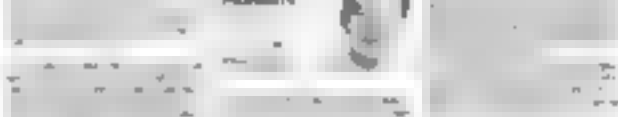

Integrity vs hypocrisy

MENTOR

Mentors

When we hear the word "mentors," we usually think of the people who guide and support us in our lives. They are the people who help us to grow and develop.

But there are other people who are also mentors. They are the people who teach us about the world and ourselves. They are the people who help us to understand the meaning of life.

Therefore, we must pay attention to these people and learn from them. They are the mentors who will help us to become the best version of ourselves.

Figure 1 displays a sequence of handwritten digit '4' images, illustrating the process of digit recognition. The images are arranged in a 4x4 grid, showing the digit '4' formed by a single stroke (left-to-right) and the digit '4' formed by multiple strokes (top-to-bottom). The images are labeled with 'Left-to-right' and 'Top-to-bottom' arrows.

A sculpture blooms in Quezon City

By [Name]

MANILA (Inquirer.net) — A sculpture of a woman, known as the 'Mother of the Nation', is set to be unveiled in Quezon City. The sculpture, which is a tribute to the late President Corason Aquino, is a masterpiece of modern art. It is a large, abstract sculpture made of metal, depicting a woman in a flowing dress. The sculpture is located in a park in Quezon City, and it is expected to become a landmark attraction for visitors to the city.

Abby Abella, the artist who designed the sculpture, is seen here in her studio in Quezon City.

Figure 1 consists of 12 panels, labeled (a) through (l), each showing a growth curve for *E. coli* O157:H7 in ground beef. The y-axis for all panels is \log_{10} CFU/g, ranging from 0 to 12. The x-axis for all panels is time in hours, ranging from 0 to 24. Panel (a) is the control (no treatment), showing a growth curve that reaches a maximum of approximately 11.5 \log_{10} CFU/g at 12 hours. Panels (b) through (l) show the effect of heating ground beef at 100°C for increasing durations: (b) 15 min, (c) 30 min, (d) 45 min, (e) 60 min, (f) 75 min, (g) 90 min, (h) 105 min, (i) 120 min, (j) 135 min, (k) 150 min, and (l) 165 min. As the heating duration increases, the maximum growth level (the peak of the sigmoidal curve) decreases. For example, at 165 min (panel l), the maximum growth is approximately 5.5 \log_{10} CFU/g. The growth curves are sigmoidal, with the maximum growth occurring around 12-18 hours. The treatments show a clear dose-response relationship, with longer heating times resulting in lower maximum growth levels.

File sharing is a new way of sharing files on the Internet. It allows users to share files with others on the Internet. This is done by using a central server that stores the files. Users can then access the files from their own computers. This is a very convenient way of sharing files, and it is becoming increasingly popular.

Feeling fab in Baguio and Cebu

THANK God the Philippines is not just Metro Manila. Anything negative happening in our fair city should never be generalized as the prevailing situation for the whole country.

These past weeks, I have been north and south of our nation and I got the feeling we are some-

TESSA!

Tessa Prieto-Valdes

how progressing in terms of business and tourism. Although we still have huge problem areas, there has been growth in some areas of trade and industry.

Traveling north has been such a wonderful experience with the reconstruction of the North Expressway. The NLEX is a clear example of world-class infrastructure, and we have to thank Ping de Jesus and Oscar Lopez for this excellent project. The wide smooth roads and impressive toll-booths really make you feel like

WEDDINGS

To have and to hold, in fine *banbok*

Korean newbrides are looking beyond cliché negative images of the Philippines to make the country their choice honeymoon destination.

Photo and plan by GMA-7 Style

SAMANTHA, 27, a Korean bride, is about to marry a Filipino in Manila. She is not a typical bride.

She is a bride who is looking for a new bride. She is a bride who is looking for a new bride. She is a bride who is looking for a new bride.

She is a bride who is looking for a new bride. She is a bride who is looking for a new bride. She is a bride who is looking for a new bride.

Expectations

She is a bride who is looking for a new bride. She is a bride who is looking for a new bride. She is a bride who is looking for a new bride.

One of a kind

She is a bride who is looking for a new bride. She is a bride who is looking for a new bride. She is a bride who is looking for a new bride.

Sumo

She is a bride who is looking for a new bride. She is a bride who is looking for a new bride. She is a bride who is looking for a new bride.

May sipa ang bami-asim!

Although the authors do not discuss the impact of the study on the general population, it is clear that the study has implications for the general population. The authors state that the study has implications for the general population, and that the study has implications for the general population.

It is not that the author has said that people are becoming more social, larger and better, or that the human factor has been "improved" but that the world has become "bigger" and that it is the task of world leaders to make sure that the world is a better place.

The house where 'Big Brother' lives

For the past 15 years, a house in the heart of the city has been the home of a unique experiment. It's a place where the lives of 100 strangers are being watched, recorded, and analyzed. The house is the set for the reality show "Big Brother," and the residents are the contestants. The show is a social experiment that explores the behavior of people in a confined space. The contestants are given various tasks and challenges, and their interactions are monitored by a panel of judges. The show has become a cultural phenomenon, and it has inspired a new genre of reality television. The house is a small, two-story building with a modern design. It has a large living room, a kitchen, a dining room, and several bedrooms. The residents are given access to all the amenities of the house, but they are not allowed to leave the premises. The show is a fascinating look into the human psyche, and it has provided a wealth of information about human behavior. The house is a place where the boundaries of reality are blurred, and the residents are living in a world of their own making. The show is a testament to the power of the human mind, and it is a reminder that we are all living in a house of our own making.
